

We have been informed that the STC application has been submitted to the FAA. Paul Odum says:

"I expect STC issuance on or before July 6th. It will take an additional 2 weeks maximum for PMA approval from our local MIDO, Los Angeles. Normally the MIDO turns the PMA in one week.

I will have all Grumman AA-5 installation kits, 16 at this point, packed and ready to ship on or before July 13th.

We will take orders for another two weeks or so. Our turnaround for installation kit MFG is really quick on this one. Unfortunately, due to design, MFG costs are not cheap since we are having to 5 axis CNC machine parts."
